The "Harmonious" Democracy Our evening contemporary naturally does not like to be reminded that the Dem ocratic State Convention was manipulated

by Chairman Brown, but that is the bald fact hevertheless. It characterizes as an "amusing fabrication" the statement that Brown not only secured a "vindication" but forced the convention to take up his quarter and punish Redman who was cast and the best that has yet been made. It has the simple directness and the pungent it rests in the power of any convention to whitewash S. S. Brown, who, by the way, first secured his present position largely it and so shriply before the hearer and first secured his present position largely through the efforts of Mr. Bass, still the convention so far as it was concerned gave him and his methods its practical indorse-As an evidence that this indorsement was entirely satisfactory to Brown we quote the following extracts from the organ of his chief heutenant, Editor Bun-ker, who is in a very happy frame of mind ove the defeat of the Bass faction: Home Rule, says Mr. Blaine, is what every State and Tarriory of the United States enjoys and what Ireland coes not enjoy. Ireland has no Lower over her own domestic affairs. It is precisely as if Maine or Pennsylvania had no control over her internal account.

VICTORIA, B. C., June 4. An American miner named Sproul who was convected of murder under what was subsequently shown to be perjured testimony, will be langed Sunday, June 6th, unless counsel succeed in procuring a respite. The people of Victoria held an indignation meeting some time ago; protesting against the currying out of the sentence. The case is said to be one in which the United States government should ask a stay of execution until the facts of the perjured evidence were investigated otherwise a man will be hanged who is believed to be impocent. The Use of Cement Pipe for Sewers. ng yeto was illed with City Clerk Genry yesterday afternoon; abla the Common Counc 1 of the City of Julea; abla the Common Council of the City of Julea; as a setton of your knoweable body Friday eventual, April 2, 1886, he hereby returned and action of your knoweable footy bridge council profiding for out my approval. (Here is given at length the resolution adopted by the Council prystiths; for a cement sewer in Albany street.)

The sewerage of our city is a very important matter both from a sentency and financial standpoint. Our City Surveyor, who is thoroughly competent to judge, las recommended intrified servir pipe as the cheapest, safest and best. Since it is quest on was brong a before the Council later are either over they letters from surveyors and engineers of different (the unanimously test) that they are chiefly of this pipe, and stating that it is now universally used him ighout the country. Then why does the Council insist on putting down gramming of the country. Then why does the Council insist on putting down gramming the country. Some Aldermen say the people petition for ketters is some force in that I admit—that are they also make it is a marked in this matter? When the solvers prove defective (as they are doing continually) the city, and not the people must foot the bills.

And are we to pay any attention to the wall tast was dinned into our chre last fall about the sewer gas in the collars and houses of our citizens?. I think we should. If these evils are to be a modified the city should have a voice in the choice of pipe, and I other should acception after the content the city and have a voice in the choice of pipe, and I other should acception after the remaining the stat it is manufactured here, and a prominent politician is interested in its sale.

The only real argument that has here for one be made in favor of the coment pipe we are now making is that it is manufactured here, and a prominent politician is interested in its sale.

It seems to the this innet forcible energia to justify joparadizing the lives of our citizens through defective sewerage, and the depiction of their politicis in the count in a system with inferior pipe.

This is not expensive and dangerous a monopoly for this Council to encount gen maintain.
